This document includes a roadmap, upgrade recommendations, and a release schedule along with pertinent support information for Oracle Database releases (Major, Patch Set and Annual Releases). The content below represent the most accurate information Oracle can provide and is updated frequently. Because Support cannot provide any dates other than these to customers, please do not log a Service Request asking for a schedule update.

What's New?

- **19c Exadata Cloud Service released in all OCI Database Centers (6/19/2019)**
- **19c Database released on-premises for Microsoft Windows 64bit**
- **19c Database released on-premises for ZLinux (06-Jun-2019)**

Oracle Database Release Roadmap

To help you plan ahead, below is a roadmap that captures Oracle Database Releases (incl. annual and patch sets) from 11.2 and later, showing their lifetime support stages and duration in relationship to the overall life of the release. For a table with this data, see *Table 3 - Patching End Dates* below.

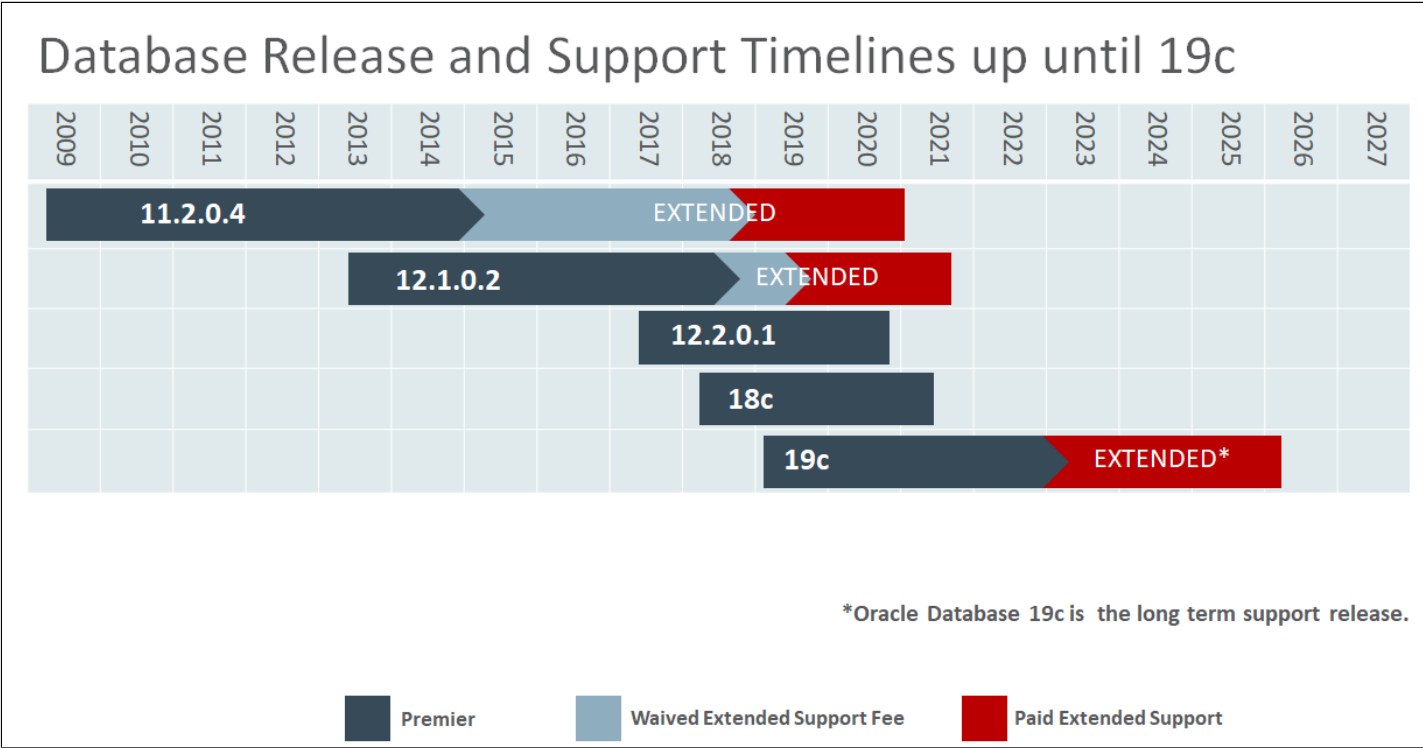

Figure 1 - Database Release Roadmap

Beginning with Release 12.2: New releases will be annual and the version will be the last two digits of the release year. The release originally planned as 12.2.0.2 was released as 18, and the release originally planned as 12.2.0.3 will be release 19. For Lifetime Support purposes, Releases 18 and 19 will be under the 12.2 umbrella. Release 19 will be the last release ("long term support" release) for 12.2. Instead of Patch Sets, Patch Set Updates, and Database Bundle Patches, the new releases will be maintained with Updates and Revisions, so Patch Sets will no longer be shown in the roadmap for 12.2 and later. For more information see Update and Revisions for Database Proactive Patch Program (Doc ID 2285040.1).

Releases 12.1 and earlier: Patch sets were released periodically. For Database 11.2 and 12.1, the terminal (last) patch set has been released. Proactive patches such as Patch Set Updates (PSU) are released only on those terminal patch sets.

How To Interpret The Roadmap ^{UPD}

The Roadmap above is a visual representation of our past and current release models and their corresponding Premier and Extended Lifetime Support Policy (LSP) windows (shown in red/dark red above):

- Past: (Pre-12.2)--Major Release Model e.g. 11.2, 12.1
- Current: (12.2 onward)--Annual Release Model e.g. 12.2, 18c, 19c, onward
- For the LSP policy, see [Lifetime Support Policy - Oracle Technology Products](#).
- For the Error Correction Policy (Patching end dates and grace periods), see [Database, FMW, EM Grid Control, and OCS Software Error Correction Support Policy \(Doc ID 209768.1\)](#).
- For Global ES Fee Waiver details (shown in green above), see [Oracle Software Technical Support Policies](#) Section 3 "Lifetime Support" subtitle "Exceptions". These are waivers that have been granted for all customers for a specific Major or Annual Release. During the waiver window, you will continue to receive support as if the release was still covered under an active patching cycle (e.g. end of patching has not been reached).

Recommended Upgrade Path

Oracle recommends the following upgrade options:

- Now that 19c has released on most major platforms, Oracle's stance on upgrading has shifted away from 18c as an option and is now focusing only on 19c.
- If you are currently running 11.2.x/12.1x you will need to upgrade to the terminal releases for the product you are running and then continue the upgrade process by upgrading to the 19c Database (long-term support release).
- If you are currently running 12.2.0.1, please upgrade to 19c before the error correction grace period expires.

NOTE: Oracle Database 19c is the *Long Term Support Release* or "Terminal Patch Set" for Oracle Database 12.2 Release.

The purpose of these recommendations is to help you stay within the guidelines of Lifetime Support and Error Correction Policies (allowing you to avoid costly support exceptions), and to encourage you to take advantage of the new features that are available in the latest product releases.

For questions related to certification combinations and Lifetime Support agreements with other Oracle products like Oracle E-Business Suite, Oracle JD Edwards, Oracle PeopleSoft, and Oracle Siebel, please contact your Oracle Account Representative.

Patching End Dates for Patch set and Annual Releases

The dates below show the last date Oracle will provide patches, release Updates (12.2 and later) or PSUs and CPUs/SPUs (12.1 and earlier) on all platforms. After the patching end date, Oracle will no longer provide patches (including Updates, Patch Set Updates (PSU) and Security Patch Updates (SPU)) for that release on any platform. This period is to allow customers adequate time to plan for the installation of the latest annual release. A full description of the patching support policies is given in [Database, FMW, EM Grid Control, and OCS Software Error Correction Support Policy \(Doc ID 209768.1\)](#).

The LSP and patching end dates are as follows unless noted otherwise in *Table 2 - Database Release Schedule* above.

Table 3 - Patching End Dates

Footnotes:

¹**11.1.0.7 was the last patch set for Release 11.1.** See [Patch Set Updates for Oracle Products \(Doc ID 854428.1\)](#) for additional details.

²**Base release** - Full software release obtained from edelivery or downloaded from otn.oracle.com.

³**10.2.0.5 was the last patch set for Release 10.2.** See [Patch Set Updates for Oracle Products \(Doc ID 854428.1\)](#) for additional details.

⁴The **start of Extended Support** no longer forces customers to run the last patch set in order to receive new fixes (such as PSU or CPU).

⁵**Patching end dates for terminal patchsets** of a release are equivalent to the end of Extended Support. An Extended Support contract is required to receive patches once a release enters the Extended Support phase. See the [Lifetime Support Policy covering Technology Products](#) for dates of Extended Support.

⁶**Oracle Database Release 11.2 on HP-UX PA-RISC.** See [Support Status for Oracle Database on HP-UX PA-RISC systems \(Doc ID 1313798.1\)](#) for details.

⁷**Itanium-based Systems** (HP-UX, Windows, and Linux): Additional Extended Support was made available for these platforms. The patching end date table above reflects the new end of Extended Support. See [Oracle Software Technical Support policies](#) for more details

⁸**11.2.0.4 is the last patch set for Release 11.2.** Future integrated error correction will come in the form of Patch Set Updates. See [Patch Set Updates for Oracle Products \(Doc ID 854428.1\)](#) for current details.

⁹**12.1.0.2 is the last patch set for Release 12.1.** Future integrated error correction will come in the form of Patch Set Updates. See [Patch Set Updates for Oracle Products \(Doc ID 854428.1\)](#) for current details.

¹⁰**12.1.0.1 is the last release of Standard Edition (SE) and Standard Edition One (SE1).** SE/SE1 customers should consider migrating to 12.1.0.2 Standard Edition 2 (SE2). For more information, see [Oracle Database 12c Standard Edition 2 \(12.1.0.2\) \(Doc ID 2027072.1\)](#).

Date	What Changed
19-Jun-2019	Exadata Cloud Service released in all OCI database centers; also uploaded a new Database Release Roadmap image - one that is easier to understand and read.
08-Jun-2019	Database 19c released on Microsoft Windows 64 bit. 18c Error Correction end date will be posted after 19c is released on the last on-premises platforms.
06-Jun-2019	Database 19c released on Zlinux.
28-May-2019	Database 19c released on IBM AIX, HP-UX Itanium; Modified the Upgrade Recommendations section by removing recommendations for 18c now that 19c is available on most platforms on-premises.
26-Apr-2019	Database 19c released on Oracle Solaris SPARC (64-bit)
25-Apr-2019	Database 19c released on Linux x86-64
19-Mar-2019	Modified estimated release dates for EXACS, DBCS, and ODA to Q2CY19
14-Mar-2019	Added release date for Supercluster
04-Feb-2019	Changed the expected release of Exadata Cloud at Customer from Q1CY19 to 2HCY19
12-Dec-2018	Reorganized document structure, removed outdated content; Modified recommended Upgrade Path table - added updated 19c end dates
07-Dec-2018	Updated Roadmap png with 12c (Nov 20, 2020) and 19c ES dates
07-Dec-2018	Multiple changes: Added remaining 18c release dates, added 19c expected release dates, renamed "Database Cloud Service - Classic" to "Database Cloud Service" and removed deprecated releases: "Oracle Cloud Infrastructure", "Oracle Cloud at Customer", "MiniCluster"
12-Oct-2018	Modified dates for AIX, HP-UX Itanium and z/Linux. New timeframe - Nov 2018.
10-Oct-2018	Added Upgrade Path section
05-Sep-2018	Provided release dates for Exadata CC, Exadata CS, OCI, Updated MDS timeframe to include Aug 1, 2018-July 31, 2019
30-Aug-2018	Modified dates for AIX, HP-UX Itanium and z/Linux. New timeframe - Oct 2018.
22-Aug-2018	Added 18c on Microsoft Windows x64 (64-bit)
07-Aug-2018	Added 18c on Oracle Solaris x86 (64 bit) release, reinstated the original LSP png, and replaced RU and RUR with new terminology (Updates, Revisions)
06-Aug-2018	Added 18c on Solaris Sparc (64 bit) release (July 30)
23-Jul-2018	Added 18c Linux.x64 release, updated expected release dates on additional platforms.
29-Jun-2018	Added expected release date for 18 on prem
19-Mar-2018	Added 18c release dates for ODA and SuperCluster
5-Mar-2018	Corrected release date for 18c in Cloud - 1-Mar, not 16 Feb. Changed planned date for Exadata Cloud Service to 1H2018. Added row for Oracle Cloud Infrastructure - Database
16-Feb-2018	Updated many areas to reflect the release of 18c on Engineered Systems
2-Feb-2018	Clarified in the description of the roadmap that bars start with the first release which may be in the Oracle Cloud.
18-Jan-2018	Added column for release 18 to the table of releases
8-Jan-2018	Added release dates for 12.2.0.1 on Cloud@Customer and ODA
31-Oct-2017	Corrected 12.2.0.1 bar in Roadmap, erroneously shown as 2 year should be 3
8-Aug-2017	Added clarification releases 18 and 19 are considered part of 12.2 for Lifetime Support Policy purposes, and indicated while release 19 is planned to be the last 12.2 release, this may change to release 20 in the future.
2-Aug-2017	Updated Release Roadmap section to reflect new release model for DB 12.2 and later. Updated roadmap chart to most current.
6-Jul-2017	Formatting changes, remove some information about 10.2 ES fee waiver (no longer relevant)
30-Jun-2017	Added link to download the DB Roadmap since some customers cannot see it in this document.
8-Jun-2017	updated "On-Premises Server Releases" table for 12.2.0.1 on IBM Linux on System z
7-Jun-2017	Added release dates for Db Instant Client 12.2.0.1 for Linux on POWER LE
